UPDATE YOUR PREPAID METER

FOLLOW THESE SIMPLE, EASY STEPS

The software used in all prepaid electricity meters across South Africa is set to expire in November 2024. It is crucial to update your prepaid electricity meter before the expiration date to ensure that you can continue to recharge it with new tokens. Failure to update your meter before November 2024 will result in a loss of power supply.

Saldanha Bay Municipality is currently implementing the next phase of updates, allowing municipal clients to update their meters on their own if they have not done so already.

STEP 1

All old credit tokens must be entered into the meter before entering the "Key Change Token".

There will be NO REFUNDS for UNUSED TOKENS.

You will know it is time to update your electricity meter, when you purchase electricity and receive a slip with three tokens, similar to this example

STEP 2

Once you have punched in all your old tokens, punch in **Token 1** on your slip. When the token is punched in, your meter will flash. Wait a few seconds for the meter to accept the token.

STEP 3

Punch in **Token 2** on your slip. When the token is punched in, your screen will flash again. Wait a few seconds for the meter to accept the token.

STEP 4

Now you can punch in your purchased electricity, numbered as **Token 3** on your slip. This will also serve as proof that your meter update was completed successfully.

NOTICE OF INTENT TO COMPILE AND REVIEW THE MUNICIPAL SPATIAL DEVELOPMENT FRAMEWORK (MSDF) OF SALDANHA BAY MUNICIPALITY

Saldanha Bay Municipality has embarked on a process of reviewing its Municipal Spatial Development Framework (MSDF) as per the prescriptions of the Spatial Planning and Land Use Management Act, 2013 (Act 16 of 2013) ("SPLUMA"), the Western Cape Land Use Planning Act, 2014 (Act 3 of 2014) ("LUPA") and the Saldanha Bay Municipality: By-Law on Municipal Land Use Planning (P.N. 274/2022) ("By-Law").

A MSDF is a long-term forward planning document which indicates the long-term spatial growth and development vision of a municipality. It co-ordinates the spatial implications of all strategic sector plans (engineering, transport, economic, housing, community services, etc.) of a municipality. A MSDF is also a core component of a municipality's Integrated Development Plan (IDP) and gives physical effect to the vision, goals and objectives of the municipal IDP. The MSDF is subject to the cycle of adoption of the IDP in terms of Section 25 of the Municipal Systems Act, thus requiring a full revision every 5 years with the adoption of a new IDP. Furthermore the SPLUMA requires the content of municipal spatial development frameworks to be updated every 5 years. The current MSDF was compiled in 2017/2018 and approved in 2019 by the Council and is thus due for a full review and the compilation of a new spatial development framework. When completed and approved, the MSDF will serve as a legislated guide for decision-making in development and land use planning.

The process to be followed with the compilation of the MSDF entails the compilation of a Status Quo report as a first step, which will be submitted to the Council for adoption. Thereafter, based on the results of the status quo investigation, spatial proposals will be compiled which will be subjected to a public participation process for comment. The proposals will be updated with input received as applicable and submitted to the Council for discussion. The final draft MSDF will be published together with the draft IDP for public scrutiny before final approval by the Council in the second quarter of 2025. For a detailed process plan please refer to <https://sbm.gov.za/spatial-development-framework/>.

Members of the public are hereby invited to register as interested and/or affected parties (I&APs) and/or to submit written input for consideration during the process, on or before 31 July 2024. Any queries or input can be directed to Mr Gary Tomlinson at 022-7016981, or gary.tomlinson@sbm.gov.za.
